Tableau Portfolio: tableau.public.com/app/profile/jaleah.beason

Recent Computer Science graduate from Bellarmine University with independently built project experience spanning data pipelines, machine learning and dashboards, plus hands-on experience across product, data analytics, business operations and client-facing roles. Comfortable using SQL, Python, Excel and Tableau to turn raw data into actionable insight, gathering requirements and building roadmaps in Agile environments, and building and sustaining professional relationships with stakeholders and customers alike. Uses generative AI tools daily to work faster and more accurately.

EXPERIENCE

Owner

December 2022 – July 2026

Le Sucre (Baking Business) | Louisville, KY

- Ran a cookie, brownie, and cinnamon roll business solo end-to-end: buying, production, quality control, pricing, and customer fulfillment
- Sourced ingredients through bulk buying at Restaurant Depot and Costco, balancing cost against quality through hands-on taste and quality testing
- Owned the full customer relationship, from order to delivery, in a fast-paced, deadline-driven environment

Data Analytics Intern

January 2026 – June 2026

Essential Innovations | Louisville, KY

- Queried and evaluated data and tagging structures across three integrated government benefits systems (TANF, SNAP, Medicaid) using SQL, independently identifying root causes of data-quality discrepancies and resolving them
- Owned recurring reporting for stakeholders, building and maintaining data structures in Excel and documenting findings for technical and non-technical audiences
- Supported consolidation of multiple benefits applications into a single unified intake system, improving downstream data quality and eligibility routing

Software/Product Intern

December 2025 – May 2026

Tridna (Sports Analytics Startup) | Louisville, KY

- Partnered with the product team to gather stakeholder requirements and translate them into specifications and backlog items the engineering team could build against
- Used usage-metric and user-behavior data insights to recognize what made features valuable and prioritize a roadmap centered on user experience
- Participated in Agile ceremonies including sprint planning and backlog grooming, collaborating closely with engineers and designers

Client Service Representative, 401(k) Division

April 2025 – September 2025

ADP | Louisville, KY

- Served as a trusted point of contact for enterprise clients, diagnosing account issues and escalating to internal technical teams with full context for resolution under deadline pressure
- Investigated and documented client-reported issues, building and sustaining professional relationships while translating technical detail into plain-language explanations

Merchandising Associate

June 2021 – October 2024

Broadway Apparel | Louisville, KY

- Used sell-through data and customer feedback across four product lines to inform restocking, discontinuation, and merchandising decisions
- Negotiated shipping timelines, order quantities, and cost directly with suppliers, switching vendors when reliability or pricing no longer held up
- Tracked performance metrics across product lines and flagged risks early to support planning

Sales Associate

January 2024 – April 2024

Kia | Louisville, KY

- Guided customers through product and financing comparisons on the sales floor, translating options into clear recommendations that closed sales
- Built rapport quickly with a broad customer base in a fast-paced, target-driven retail environment

Warehouse Associate (Seasonal)

2022

Amazon | Louisville, KY

- Gained first-hand exposure to Amazon's fulfillment network and operational standards while supporting high-volume picking, packing, and sorting during peak season
- Met throughput and accuracy targets in a fast-paced, deadline-driven fulfillment environment

SKILLS

Product & Process: Requirements gathering, user stories, Agile/Scrum (sprints, backlog grooming), roadmap prioritization, stakeholder management, process improvement

Data & Analytics: SQL, Python, Excel (pivot tables, macros), Tableau, KPI tracking and reporting, data quality management

Business & Customer: Buying, supplier sourcing and negotiation, account/vendor management, customer relationship ownership

Tools: Streamlit, SQLite, mysql-connector-python, HTML, generative AI tools (Claude)

EDUCATION

Bachelor of Arts in Computer Science, Bellarmine University, Louisville, KY, May 2026

Relevant Coursework: Data Structures, Database Management Systems, Software Design & Development, System Architecture, Data Communications & Computer Networks

PROJECTS

- **Parking Tag Object Detection (Group Project)** (*Python, YOLOv11, Roboflow*): Collaborated on a single-class object detection model trained via transfer learning on a custom dataset, achieving 0.99 mAP@0.5, 0.99 precision, and 0.95 recall.
- **Wildlife Object Detection** (*Python, Jupyter Notebook, Computer Vision*): Independently built and trained a machine learning model for wildlife object detection, including a full project report and presentation of results.
- **BakersParadise** (*Python, SQLite, Streamlit*): Independently designed, built, and shipped a full data product end-to-end: relational schema, SQL analysis layer, and a live Streamlit interface real users could self-serve from.
- **Online Retail Analysis, 2010-2011** (*Tableau*): Built a dashboard analyzing a year of UK e-commerce transactions (\$10.6M revenue, 20,725 orders, 4,340 customers), surfacing monthly trends and top products for business decisions.
- **State Pre-K: Cost vs. Outcomes** (*Tableau*): Built an interactive dashboard comparing state-level Pre-K spending against NAEP reading and math outcomes, with a year parameter for cross-state comparison.
- **Shopping Mall Database** (*SQL, Python*): Designed a relational database with full CRUD functionality and 5 stored procedures (IN/OUT parameters, JOINS); built a Python command-line client using mysql-connector-python.
